

ACCESS CONTROL

ORC-AC-S1

SPECIFICATION

CPU	Dual Core 1.3Ghz
MEMORY	4GB
STORAGE	20GB
NETWORK	100Mb NIC

DESCRIPTION

Orcomm access control software suite is designed to easily manage your access control system.

Configure, monitor, add/remove users and permissions from a single point. All configuration is uploaded to the individual door controllers for complete system isolation in event for power/software malfunction.

Simply installed on your site manager's PC clients or on a central server to allow multi user management.

Get real time information as well as stored controller information.

In Control Of Your System:

- Multi User
