

# ORC-HC2-24D-RS485-WHF

Dual Climate control in white

### **DETAILS**

| Fascia Size          | 86 x 86 x 15mm                              |
|----------------------|---|
| Weight               | 0.2Kg                                       |
| Finish               | SWhite                                      |
| Control Type         | FCU through Orcomm Gateway                  |
|                      | UFH through Orcomm Gateway                  |
| NTC External Feature | Designed for override of local floor sensor |
| Data Memory          | EPROM                                       |
| Local Output         | None  |
| Program Periods      | None  |
| Button Type          | Touch                                       |
| LCD Backlit          | Yes   |
| TI Advance           | Yes   |
| Lens                 | Acrylic                                     |

#### **DESCRIPTION**

Orcomm HC2-24D thermostat is from our latest range of heating control solutions. Offering a unique way to control your homes heating and/or cooling.

These smart room controllers require an Orcomm smart Heating Gateway. Low powered and RS485/Modbus communication allows fast and easy installation.

Simple to install within a UK standard single gang Electrical box (35mm deep). Local adjustments to suit different environments.

#### **TECHNICAL INFORMATION**

| Power             | <1W                                 |
|-------------------|-------------------------------------|
| Voltage           | 24V DC (+/- 10%)                    |
| Current           | <200mA                              |
| Temperature       | 5°C - 55°C                          |
| Degree Reading    | +/- °C                              |
| Accuracy          | 0.5°C                               |
| Local Temp offset | +/- 9°C                             |
| Communication     | RS485/Modbus                        |
| Baud Rate (bps)   | D=9600, 19200, 38400                |
| Addressing        | D=1, up to 64                       |
| Cabling           | RS485/Modbus (Shielded Belden 9841) |
|                   | Power 0.3mm x2 (per 30m)            |
| NTC External      | Yes (10K NTC)                       |

## **NOTES**

ORC-HC2-24D-RS485-WH has no local control and must be installed to an Orcomm smart Gateway. The Gateway will assist in controlling the FCU and UFH devices.

NTC external can only be read by the Orcomm Smart Touch Screen or Gateway.
