

ACCESSORIES

ORC-UM-R

DESCRIPTION

Orcomm Unlock Module is designed to allow door release remotely from the external panel for higher security. The ORC-UM-R intelligent relay is designed for trades access for dedicated approved times.

One zone control options include gate, barrier and electronic doors using our on-board 10A Relays. Two pole relay for additional features when required.

Secure by Design required product when installed with ORC-E range panels.
