

Quick Guide for ORC-CONIPHS-V

ORC-CONIPHS-V Video Desk phone is ideal for concierge calling.

The built-in camera allows video call from concierge to the residents within the apartment.

Weblink <https://www.orcomm.co.uk/product/orc-coniphs-v/>

Default web login:

U: admin

P: admin

Set up Desk Phone IP address

Set up the IP desk phone's network settings, this must be on the same range as the network which the intercoms are connected to.

This is performed by physically entering the settings menu and typing the desired configuration in network page.

Set up Concierge PC software

This requires the concierge software to communicate with the VoIP phone.

Enter Setting menu by clicking on Orcomm logo

Default "settings"

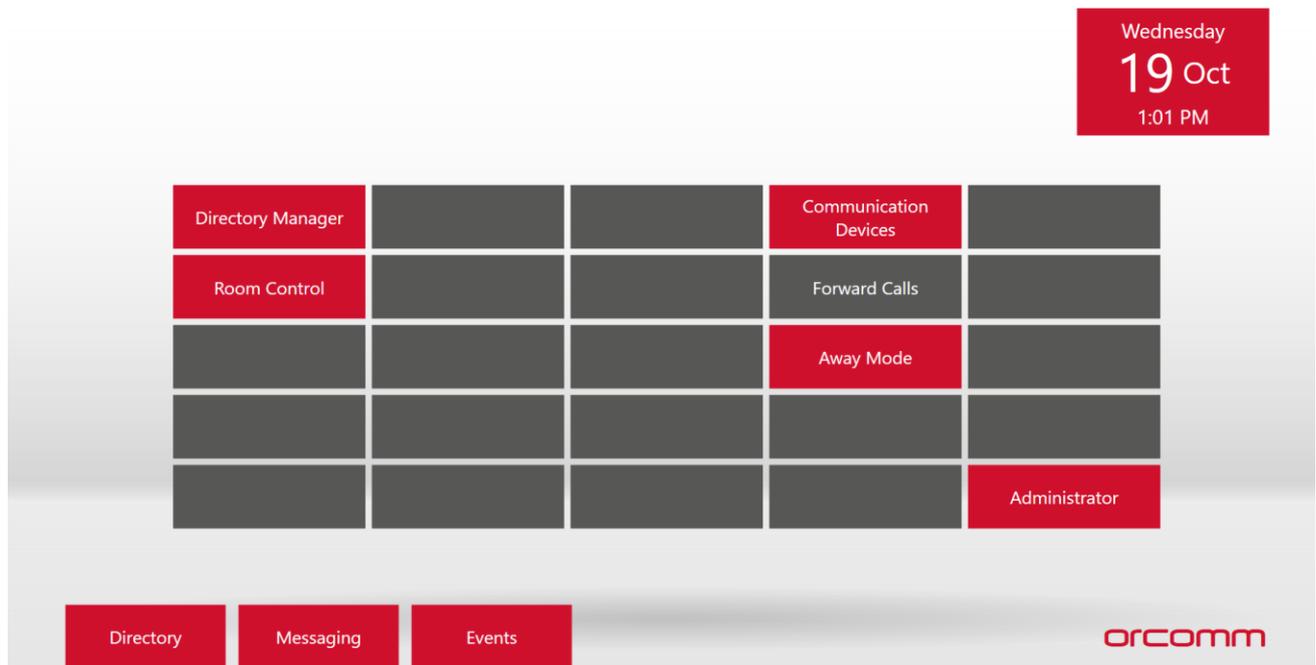

The screenshot displays the Orcomm web interface. At the top, there are two tabs: 'Call Directory' (selected) and 'Call History'. A search bar is located below the tabs. The main content area shows a list of four entries in a table:

1010001			New	Smart Screen
1010002			New	Smart Screen
1010003			New	Smart Screen
1019901			New	Door Entry

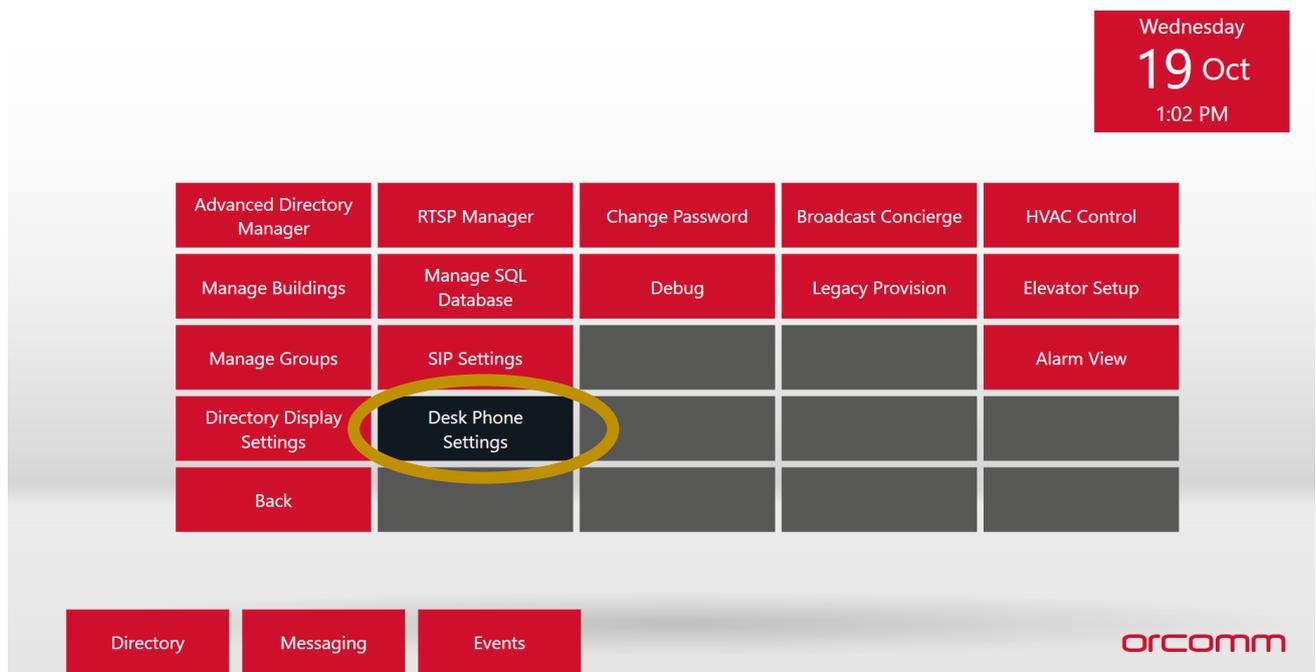

On the right side, a red box displays the date and time: 'Wednesday 19 Oct 1:00 PM'. At the bottom, there is a navigation bar with three buttons: 'Directory', 'Messaging', and 'Events'. The Orcomm logo is visible in the bottom right corner, circled in yellow.

Enter administrator area

Default "admin" (note this is the first password when loading software)

Enter Desk Phone credentials

The image shows a 'Concierge Desk Phone Settings' dialog box with the following fields and callouts:

- Enabled:** A checked checkbox with a callout box that says "Check 'Enabled'".
- Phone Type:** A dropdown menu showing "Yealink T58V" with a callout box that says "Choose the correct model".
- IP Address:** A text field containing "192.168.0.2" with a callout box that says "Enter IP address of desk phone".
- Username:** A text field containing "admin".
- Password:** A password field with masked characters (dots) with a callout box that says "Enter Desk phone credentials".
- Buttons:** "OK" and "Cancel" buttons at the bottom. The "OK" button is circled in yellow.

Desk Phone - Remote Directory

From a web browser, enter IP address of PC followed by port 8080, then /phonebook

Example 10.0.10.5:8080/phonebook

This will display the concierge phone in XML. If the phonebook does not load, please check there are entries in the directory and then the desk phone option is enabled from the concierge software.

If not already logged into the desk phone via a web browser. Navigate using a web browser to the IP address of the desk phone and login using the admin credentials if required.

1. Go to Directory
2. Click on Remote Phone Book
3. Enter the phone book link into the list
4. Enable Incoming / Outgoing Calls Lookups
5. Click Confirm

The screenshot shows the Yealink T58 web interface. On the left is a navigation menu with 'Directory' expanded and 'Remote Phone Book' selected. The main content area features a table with columns for '#', 'Remote URL', and 'Display Name'. The first row contains the URL 'http://10.205.99.95:8080/phonebook' and the name 'Phonebook'. Below the table, the 'Incoming/Outgoing Call Lookup' toggle is turned ON, and the 'Update Time Interval (Seconds)' is set to 3600. A 'Confirm' button is located at the bottom of the form. A yellow arrow points to the first row of the table, and a yellow circle highlights the 'Confirm' button.

#	Remote URL	Display Name
1	http://10.205.99.95:8080/phonebook	Phonebook
2		
3		
4		
5		

Incoming/Outgoing Call Lookup: ON

Update Time Interval (Seconds):

NOTE

Remote Phone Book
It is a centrally maintained phone book, stored in the remote server.

Users only need the access URL of the remote phone book. The IP phone can establish a connection with the remote server and download the phone book, and then display the remote phone book entries on the phone user interface.

Desk Phone - Enabling Remote Directory

If not already logged into the desk phone via a web browser. Navigate using a web browser to the IP address of the desk phone and login using the admin credentials if required.

1. Go to Directory
2. Click on Settings
3. Move the Remote Phone book into the Enabled section on the right
4. Click Confirm

The screenshot shows the Yealink T58 web interface. The left sidebar contains a navigation menu with 'Directory' selected. The main content area is titled 'Directory' and is divided into two sections: 'Directory' and 'Search Source List In Dialing'. Each section has a 'Disabled' and an 'Enabled' column. In the 'Directory' section, 'Local Directory' and 'Remote Phone Book' are listed. In the 'Search Source List In Dialing' section, 'Local Directory', 'History', and 'Remote Phonebook' are listed. A yellow circle highlights the 'Remote Phone Book' in the 'Enabled' column of the 'Directory' section. Another yellow circle highlights the 'Remote Phonebook' in the 'Enabled' column of the 'Search Source List In Dialing' section. A third yellow circle highlights the 'Confirm' button at the bottom of the page. A 'NOTE' box on the right provides information about the Directory and Search Source in Dialing features.

NOTE

Directory
It provides easy access to frequently used lists.

Search Source in Dialing
It allows the IP phone to automatically search entries from the search source list based on the entered string, and display results on the pre-dialing screen.

Recent Call In Dialing
It allows users to view the placed calls list when the phone is on the pre-dialing screen.

Desk Phone - Register Desk Phone

If not already logged into the desk phone via a web browser. Navigate using a web browser to the IP address of the desk phone and login using the admin credentials if required.

1. Go to Account
2. Click on Register

Copy the settings below into the Account 1 Profile.

- Line Active = "ON"
- Label = "Concierge"
- Display Name = "Concierge"
- Reg Name = "Concierge"
- User Name = "Concierge"
- Password = "CSqYtwgeTAM43ZpT" (default)

The screenshot displays the Yealink T58 web interface. The left sidebar is expanded to the 'Register' tab. The main content area shows the configuration for 'Account 1 (Reception)'. The 'Register Status' is 'Registered'. The 'Line Active' is set to 'ON'. The 'Label' and 'Display Name' are both 'Reception'. The 'Register Name' and 'User Name' are both '200'. The 'Password' is masked with asterisks. Under the 'SIP Server 1' section, the 'Server Host' is '10.205.98.99', the 'Port' is '5060', the 'Transport' is 'UDP', and the 'Server Expires' is '3600'. A 'NOTE' box on the right contains the following text:

NOTE

Account Registration
Register account (s) for the IP phone.

Server Redundancy
It is often required in VoIP development to ensure service continuity, for events where the server needs to be taken offline for maintenance, or for events when the connection between the IP phone and the server fails.

NAT Traversal
A computer networking technique of establishing and maintaining Internet protocol connections across gateways that implement NAT.

You can configure NAT traversal for this account.
